Ready

## How Cincinnati's ECC achieved training excellence with advanced reporting.

CHALLENGE ONE

Previous software fell short, offering limited insight into trainee performance and program effectiveness. Without adequate data and real-time insight, maintaining high training standards was a challenge.

✔ OUTCOME

Real-time visibility into trainee progress.

Advanced reporting ensures trainees hit clear benchmarks before being released into the field. Customizable tasks and goals address their unique training needs.
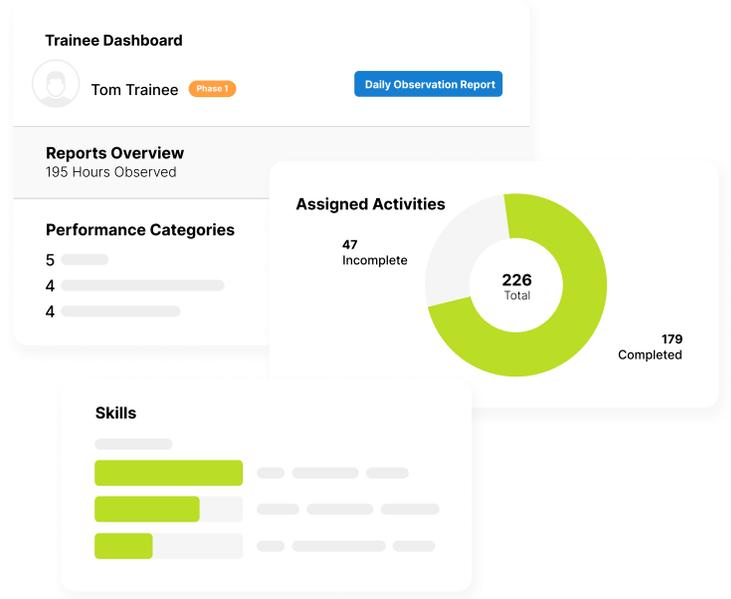

CHALLENGE TWO

Scattered training records made promotions and lateral transfers time-consuming and stressful.

✔ OUTCOME

One centralized location for easy access to all new role training records.

Each trainee's new role training history is now accessible in one place. The ability to customize onboarding for different roles streamlines promotions and lateral transfers.
